Basic Version Logo

This logo design seamlessly bridges advanced technology with human essence, representing a system that thinks, feels, and operates instantaneously. By blending the organic structure of a Neuron, the precision of Time, the spark of AI, and the core of a Heart, the visual identity tells a story of intelligent, empathetic innovation. "REAL TIME TECH is where intelligence meets pulse. The logo captures a single, powerful moment a neuron firing in real-time, its central core shaped like a heart to represent empathetic, human centric engineering. The subtle geometric alignment pays homage to the precision of time, while the sharp, clean lines embody the brilliance of AI. It is a visual promise of technology that thinks fast, but cares deeply."

Typography

The Preahvihear font was created by the prominent Cambodian typeface designer Danh Hong (ដាញ់ ហុង).

He is widely known for developing a massive collection of open-source Khmer script fonts, many of which are named after historical locations or provinces in Cambodia (Preah Vihear itself being a famous ancient temple and province).
